INTRODUCTION

This index was prepared to aid the user in determining which tractor, engine or power unit a particular part is used on if only the part number is known.

The parts in this index are grouped alphabetically according to their prefix or suffix letters and are arranged numerically within each group.

Opposite each part number is shown the parts catalog or catalogs wherein a full description of the part can be found. For example:

Part Number	Catalog in Which Listed
6 245 D	TC-27, 28, 29, 30, 31, 32, 33, 34, 35

Some parts, such as the above, are indexed

“TC-27 to 35,” etc., indicating the part will be found in all catalogs between the catalog numbers shown.

Frequently, it is necessary to reprint parts catalogs, due to design changes, improvements, etc. Our policy when reprinting a parts catalog is to add a suffix letter after the catalog number. For example, when parts catalog TC-1 was reprinted it was assigned form number TC-1A. Subsequent reprints advanced the suffix letter to B, then to C, and finally to TC-1D, which is the number of the current addition. For convenience and to conserve space this index lists only the basic catalog number; however, all parts contained in the various reprints are listed.

Following is a list of all of the parts catalogs covered by this index:
